Professional Summary

Software Engineer (Frontend-Focused Full-Stack)

Computer & Communication Engineering student building production-grade web applications.

- Built and shipped multiple production-grade web applications used by real users.
- Recognized in competitive hackathons and programming contests (**Samsung, Huawei, ICPC, UGRF**).
- Strong foundation in system design, scalable architectures, and cloud-based deployments.

Technical Skills

- Languages: TypeScript, JavaScript, Python, C/C++
- Frontend: React.js, Next.js, Tailwind CSS, Framer Motion
- Backend: Node.js (Express), REST APIs, Prisma, JWT-based Auth, Socket.IO, BullMQ
- Databases: MongoDB, PostgreSQL, Firebase
- DevOps & Cloud: AWS (EC2, S3), Docker, GitHub Actions (CI/CD)
- Tools: Git, Agile/Jira, Figma

Education

Faculty of Engineering, Mansoura University, B.Sc. in Computer & Communication Engineering — Sep 2021 – Jun 2026

- GPA: 3.74 / 4.0
- Relevant Courses: *Data Structures, Algorithms, Database Systems, Software Engineering*

Nile University UGRF 2025 Participant – Junior Researcher — May 2025 – Aug 2025

- Presented BloodFlow in **Undergraduate Research Forum** (Digital Healthcare Track) earned certificate recognition among 800+ submissions from 50+ Universities across 10+ Countries.

Work Experience

Backend Developer | Taqnit Al-M'alumat — Sep 2025 – Present

- Built and maintained **Node.js + TypeScript** backends for multiple production tourism platforms.
- Integrated external travel providers **(Agoda, Amadeus)** and internal services with fault-tolerant API design.
- Developed **real-time CRM** systems using Socket.IO and WhatsApp Business API for customer communication.
- Designed scalable systems with **BullMQ**, multi-tenancy, RBAC, and Dockerized deployments on AWS.

Coding Instructor | DECI | (MCIT, Udacity Partner) — Jul 2025 – Aug 2025

- Delivered in-person training on JavaScript, React, Node.js, and software engineering principles to 100+ students.
- Designed structured learning paths and hands-on projects to improve student outcomes.

Frontend Engineer Intern | Vezeeta (Health Tech) — May 2025 – June 2025

- Built and optimized TypeScript React components for Thndr like **Stock Market App**, using **Next.js**.
- **Worked with QA** to raise test coverage to 85% using Storybook + Cypress.

React.js Intern | Digital Egypt Pioneers Initiative (DEPI) — Apr 2024 – Oct 2024

- Developed **5 React apps** with 30% better Lighthouse scores.
- Awarded **DEPI Top Performer** (top 5% of 200+ interns).

IoT Engineer Intern | Samsung Innovation Campus — Aug 2023 – Oct 2023

- Led a 4-member team to build a fire-detection system using **Raspberry Pi + Node RED + Flask** winning 1st place.

Projects

Nexify – Multi-Tenant CRM Platform (Graduation Project) Live

React | Zustand | React Query | RBAC | Scalable Frontend Architecture

- Led the complete frontend architecture for a multi-tenant CRM platform.
- Designed scalable state management and reusable component patterns for long-term maintainability.

Dawak – AI Powered Medication and Reminder App (VICTORIS – IEEE) Github

Node.js | Express | MongoDB | Cron Jobs | JWT Auth

- **Built AI-powered prescription scanner** and drug interaction detector.
- Processed 191K+ drug interactions with millisecond-level lookups.
- Top 10 Finalist – VICTORIS IEEE Competition (2025).

BloodFlow – Donor Matching Platform (Hackathon Winner & UGRF Research) Github | Live

MERN Stack | WebSockets | FCM | JWT Auth | Google Maps API

- Significantly reduced donor–patient matching delays using real-time location alerts.
- Admin dashboard for hospitals to manage inventory; **3rd Place** – Samsung Hackathon 2024; showcased at **UGRF** 2025.

LUMIRA – E-Commerce App Github | Live

MERN Stack | Zustand | React Query | Tailwind CSS | OAuth

- Full-stack e-commerce platform with admin dashboard, optimized client-side caching and API usage.

More projects on **GitHub**: **NodeJS-Boilerplate**, **TaskHorizon**, **GPA Calculator**, **Native Habit Tracker App**

Certificates

- **Web Development Using React JS (150 hrs.)**
  - Information Technology Institute - Sep 2025
- **AWS Cloud Foundation**
  Deployed BloodFlow on EC2/S3 - Apr 2025
- **React.js (DEPI)**
  - Built 5+ apps with Hooks, Context API - Oct 2024
- **Huawei AI HCIA**
  - Trained ML models for IoT - Aug 2024
- **Meta Database Engineer Certificate**
  - Coursera - Nov 2023
- **IoT Specialization**
  - Samsung Innovation Campus - Oct 2023
- **CS50x**
  - Introduction to Computer Science – Harvard, EDX

Awards & Achievements

- **4th Place**
  - VICTORIS (**Dawak AI App**, IEEE 2025)
- **3rd Place**
  - Samsung Innovation Campus Hackathon
  - (**BloodFlow** Project, 2024)
- **2nd Place**
  - Huawei AI HCIA Competition (2024)
- **1st Place**
  - IoT Fire Detection
  - (Samsung Innovation Campus, 2023)
- **1st Place**
  - C Programming Contest (2023)

Leadership & Extracurriculars

- Frontend Circle Head & English Supervisor | **CAT Reloaded** 2023 – Present
- PR Team Member | **ICPC** 2024 – 2025
- Frontend Developer & Member Development | **IEEE Mansoura CSC** 2023 – 2024

Languages

- **Arabic** – Native
- **English** – B2 (Advanced Tech Docs, Presentations)
